300% Increase in C-CDA Records, Are You Ready?

HIT Consultant reports that a quarter of a billion EPIC EHR patient records were exchanged through C-CDA architecture over the last 12 months - up 300% from the year prior. As a leader in the Consolidated CDA Health Story initiative, the InfraWare Transcription service and platform uses C-CDA as it was intended, to allow your dictators to document the actual patients' story rather than checking a generic box.

Heart Monitoring Under Shirts

Mobility in healthcare is an exciting topic. Within the linked Huffington Post Article, Ron Avignon explores future thinking ideas such as undershirts that constantly monitor our heart rates. Also mentioned are HIPAA-compliant mobile apps (i.e. InfraWare Mobile). Those having the most impact are described as having increased access to point-of-care tools, which improve clinical decision-making and patient outcomes.

Read about InfraWare's mobile solution for dictation and back end dictation recognition.

Doctor Signatures Result in Medicare Denials for Hospital

The Wisconsin Physicians Service group released a helpful list of 200 documentation errors that can lead to a Medicare denial. InfraWare offers several options, such as electronic signatures, to improve your reimbursements.
